

Internship Program

Category: Career Support | Duration: Flexible (Based on Project & Domain)

Program Overview

Synapsetrix offers project-based internships across all the domains we teach - Full Stack Development, Agentic AI, App Development, Data Analysis, Cloud Computing, and Digital Marketing. Internship duration and structure are customized based on the student's chosen domain, current skill level, and availability.

How It Works

- Submit an internship request specifying your domain of interest
- Get matched with a real or simulated project in that domain
- Work under mentor guidance with regular check-ins
- Present your completed project and receive a certificate of completion

Available Domains

- Full Stack Development
- Agentic AI
- App Development
- Data Analysis
- Cloud Computing
- Digital Marketing
- Python / C / C++ Projects

To request an internship, fill out the internship request form on our website specifying your domain of interest, availability, and current skill level. Our team will get in touch to discuss the project and onboarding.
